**Proposal # 19:** Establish an angel investor tax credit program for certain investments in small Businesses

(This is technically an individual income tax issue)

Revenue Score: Only \$6.5 million of the total \$40 million tax credits authorized by the Kentucky Investment Fund Act have been taken since its inception on July 15, 1998. However, over \$18 million in credits have been approved and are no longer available. While they may not have been collected by the approved entity yet, they remain allocated. The new proposal would certainly increase the credit applications and the utilization of the new credits. Depending on the annual caps in the proposal, the expected annual fiscal impact would be between \$2.0 million and \$6.0 million. The new provisions in proposal #19 would allow the applicants to more quickly use the credits awarded.

**Proposal # 95:** Repeal the school tax rate exclusion from sales tax calculation on “residential telecommunications service” found in KRS 139.470(9)

Revenue Score: A repeal of the sales tax exclusion on the school tax portion of a residential phone bill should have a fiscal impact of less than \$500,000. Without an amendment to the sales price definition during the 2013 General Assembly, Kentucky will be found out of compliance with SSUTA thereby jeopardizing sales tax collections from SST vendors. In FY12 total collections were \$18 million, with \$10.4 million of that from voluntary sellers.
